

PROFILE

My work has always been the same: take something complicated and explain it in a way that people understand and know what to do with it. After 8 years in international communications, I learned that information without context is useless. When I started working with data, I saw the same problem: organisations with regulation on top of them, data everywhere, and no clear idea of where to start. That is where I fit in. I understand the legal framework because I have a Master's in Human Rights. I know how to work with data through SQL, Python and Power BI, and hold the *CDMP Associate* to formalise that knowledge in data management. And I know how to explain it: trained 200+ people across 15+ countries, in English, French and Spanish. What I am looking for now is to help organisations not just have governance frameworks, but teams that understand what they mean and know how to apply them.

SKILLS

DATA & ANALYTICS	GOVERNANCE & COMPLIANCE	TRAINING & COMMUNICATION	TOOLS & PROJECT MGMT
SQL · Python (Pandas, NumPy) · Power BI (DAX, Power Query) · Tableau · Excel · Google Analytics · KPI framework design · EDA	CDMP Associate · DAMA DMBOK · EU AI Act · GDPR · FRIA · Algorithmic bias detection · Human rights approaches to AI · Data quality & integrity · Ethical impact assessments	Data literacy programme design · Workshop facilitation · Training delivery · Storytelling · Strategic communications · Multilingual content (ES, EN, FR, VAL) · EU compliance reporting	Notion · Asana · Jira · HubSpot · WordPress · n8n · Google Workspace · Microsoft Teams · EU project coordination · Multi-stakeholder management

EXPERIENCE

EU Communication Manager · Fundación Equipo Humano

Jul 2024 – Jul 2025 · Valencia

- Sole communications lead across 5+ simultaneous EU projects (Erasmus+, EURES, AISkills4CircularTransition, MH4HRM, MORAL) with partners in up to 10 countries.
- Designed KPI frameworks and delivered 6-monthly EU compliance reports for the European Commission across all active programmes.
- Built a full brand template system enabling decentralised content production by staff and partners, reducing design dependency and turnaround times.
- Drafted communications and impact sections for new European funding applications.

Communication & Web Manager · La Cosecha Comunicación

Jan 2021 – Jun 2024 · Valencia

- Sole communications department for a human rights consultancy; managed 12+ client portfolios simultaneously across Spain, Colombia, Tunisia, Niger, El Salvador and Palestine.
- Designed and delivered 10+ workshops on media literacy and participatory communication for 200+ participants across 15+ countries.
- KPI tracking and impact reporting across clients and EU-funded programmes; achieved 30% improvement in video retention through data-driven social media optimisation.
- Board member contributing to organisational strategy throughout the role.

Digital Marketing & Strategic Communication · Freelance

Sep 2017 – Jun 2024 · Remote

- Independent practice across NGOs, SaaS and international organisations; client relationships averaging 12 to 24 months.
- Conversion funnel analysis using Shopify, WordPress and Google Analytics; web development, video production and social strategy.

Programme Coordinator · SB OverSeas

Sep 2019 – Apr 2020 · Brussels

- Designed and coordinated 50+ activities for unaccompanied minors and refugee women; built a partner network of 30+ contacts from scratch in the Brussels/EU ecosystem.
- Impact tracked and reported for every activity; coordinated 15+ volunteers throughout the programme.

DATA PROJECTS

Strategic Talent Retention Analysis Python · SQL · Power BI (DAX) · People Analytics End-to-end pipeline analysing a \$22M employee churn problem. Identified the 'Talent Abyss' segment (31.82% attrition rate): high performers with no stock options and no promotion in 4+ years. Delivered an executive-ready multi-page Power BI dashboard with actionable HR recommendations. GitHub	The Simpsons: Decoding 30 Years of Success Python · AI dataset enrichment · Tableau · EDA Used AI models to enrich episode metadata across 30+ seasons, then ran EDA on ratings, viewership, writers, directors and guest appearances. Key finding: writer consistency predicts ratings better than guest stars, and the viewership decline is structural (post-streaming era) rather than a content quality issue. GitHub
